## About Me

I am an experienced developer with over 15 years of expertise designing and delivering scalable, maintainable, and high-performance applications across various industries.

Passionate about building clean architectures, solving complex problems, and improving systems through automation and modern development practices.

I see software as both an art and a science — a craft refined through continuous learning, curiosity, and hands-on experience with emerging technologies, including AI and cloud solutions.

## Education

### Universidad Tecnológica Nacional

Systems Engineering

2008 – 2011

## Experience

### Full Stack Developer: Pow Gaming

May-2021 - Present

- MVP development using Python and Node.js.
